FOR IMMEDIATE RELEASE

OTI Announces Update of OptionPower for Office 2007

Option Technologies Certifies OptionPower 3.2 for Office 2007 SR2

ORLANDO, FLORIDA – November 8, 2010 – Option Technologies Interactive, LLC, a leading provider of audience response systems, today announced a major update for OptionPower 3.2 for Office 2007, an add-in software application that makes PowerPoint interactive. The new version is the second service release for the OptionPower for Office 2007 product.

Service Release 2 includes a number of product enhancements including user interface improvements to the Comparative Data Function and Hardware Wizard. Support for new keypad hardware platforms and a new Council Voting Module add-on product is also enabled.

Issues resolved in the new release involve slide animations, countdown timers, team scoreboards, question categories, the non-responder grid and hardware detection functions. The release also includes a work around for a chart refresh issue caused by a Microsoft security update for Office.

“Clients that have been using the update are really pleased with the improvements to functionality and the enhanced reliability provided by this release,” said Kristi Kinney, Vice President of Product Operations.

The new release is available on the company website at www.optiontechnologies.com or on a product CD. For more information call 407-872-3333.
